

Rat anti-Aflatoxin Monoclonal Antibody Datasheet

Product Name: mAb Rat anti-Aflatoxin	Clone No.: 1E6
Catalogue No.: MO-M40025B	Quantity: 0.5 mg/vial
Description: Rat monoclonal antibody to aflatoxin	Background: Aflatoxin is a highly toxic mycotoxin produced by a few <i>Aspergillus</i> species. Ingestion of aflatoxin contaminated food causes hepatic necrosis, cirrhosis and cancer in human and animal. Exposure to high level aflatoxin results in acute hepatic failure manifested by hemorrhage, edema, mental disorder and coma. Aflatoxin B1, the most toxic isoform, is produced by <i>Aspergillus flavus</i> and <i>Aspergillus parasiticus</i> . Aflatoxin M1 is the metabolic product of B1. M1 is found in the milk of cows that fed on contaminated feed and also in the fermentation broth of <i>Aspergillus parasiticus</i> . Chronic exposure to the toxin in milk and food impedes the normal growth and development in children.
Purification: Protein G affinity purified	
Target Protein: Aflatoxin	
Immunogen: Wistar rats were immunized with aflatoxin M1-BSA conjugate	
Specificity: The selected monoclonal antibody is reactive to aflatoxin M1 (AFM1) and aflatoxin B1 (AFB1), but not reactive to BSA and other irrelevant antigens by ELISA.	
Species Reactivity: Aflatoxin	
Host / Isotype: Rat, IgG2b Kappa	
Formulation: Lyophilized from a solution in 0.01MPBS, pH7.2	Applications: ELISA: Reactive to aflatoxin M1 (AFM1) and aflatoxin B1 (AFB1). Lateral flow test: 5ng of AFM1 (Sigma) can be detected as competitive conjugate in lateral flow test.
Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.	
Storage: Store at -20°C	
Research Area: Toxicology, food safety and mycology	References: If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide one unit of product in the same category as gratitude.

This product is for **LABORATORY RESEARCH USE** and further manufacture **ONLY**, and cannot be administered to human and animals for use in diagnostic and therapeutic procedures.

Manufactured by ANOGEN - A Division of YES Biotech Laboratories Ltd.
