

Rabbit Anti-Human Promyelocytic Leukemia Protein Polyclonal Antibody Datasheet

Product Name: pAb Rabbit anti-human promyelocytic leukemia protein (PML) [ring finger domain]

Catalogue No.: AI70002A

Quantity: 0.1 mg/vial

Description: Rabbit anti-human promyelocytic leukemia protein (PML) ring finger domain polyclonal antibody

Purification: Protein G affinity purified

Product Type: Primary antibody

Target Protein: The ring finger domain in human PML protein. The ring finger, like B box1, is retained in PML/RAR α chimera.

Immunogen: Recombinant partial human PML containing the ring finger domain

Specificity: This antibody recognizes normal PML proteins of lower molecular weight, and also recognizes the high molecular weight PML/RAR α chimeric protein in promyelocytic leukemia patients.

Species Reactivity: Human, others not tested

Source: Rabbit

Formulation: Lyophilized in pH 7.4, 0.01M PBS.

Reconstitution: Double distilled water is recommended to adjust the final concentration to 1.00 mg/mL.

Storage: Store at -20°C

Research Area: Life science research, Oncology

Background: Acute promyelocytic leukemia (PML) is a type of acute myelogenous leukemia that is caused by the translocation of the

retinoic acid receptor alpha (RAR α) gene at chromosome 17 to the promyelocytic leukemia (PML) gene at chromosome 15. The chimeric protein (PML/RAR α) has a higher molecular weight than normal PML protein. The altered proteins block DNA transcription and differentiation of granulocytes, reduce the production of red cells and platelets, consequently, resulting in anemia and thrombocytopenia.

Applications:

Western Blot:

106kD PML/RAR α --->

Western blot analysis of NB4 cell lysate using 0.2 μ g/mL rabbit anti-PML polyclonal antibody (Cat. N.: AI70002A). The band shows on the blot is the 106kDa chimeric PML/RAR α protein.

Immunofluorescence:

Staining of NB4 cells using 2 μ g/mL anti-PML polyclonal antibody (Cat. No.: AI70002A).

This product is for LABORATORY RESEARCH USE and further manufacture ONLY, and cannot be administrated to human and animals for use in diagnostic and therapeutic procedures.
